TECHNICAL SKILLS

- Languages: C, C++, HTML, CSS, Javascript,
- Frameworks: Reactjs , Nodejs, Expressjs, Bootstrap
- Databases: Mongodb
- Tools: Git & Github , Chrome DevTools , Postman

PERSONAL PROJECTS

Ecommerce   [Link](#)

- This feature-rich ecommerce website, developed from scratch, demonstrates my proficiency in web development. Using ReactJS, Redux, NodeJS, ExpressJS, MongoDB, and Material UI, I created seamless user experiences for product management, order processing, and user authentication. Integration of Nodemailer, Stripe Payment, and Cloudinary enhanced its functionality, meeting modern demands.

School-Management-System   [Link](#)

- This MERN-based School Management System offers user-specific features, allowing seamless login experiences for administrators, teachers, and students. Users can access tailored functionalities based on their roles, enhancing the overall user experience.

Weather-App   [Link](#)

- This Node.js-based Weather App simplifies checking the current weather information for any city. By entering the city name, the app seamlessly fetches API data, providing you with instant and accurate current weather details.
